oceania neocolonialism nukes and bones is a critical appraisal of the destructive consequences of colonialism and later neocolonialism and how they have reshaped and undermined the very essence of pacific humanity it provides a rather uncomfortable but justifiably powerful moral message that the perils of oceania need drawing attention to for the future survival of pacific peoples and cultures who isolated from the main centres of global power are often relegated to the margins of development and progress andre vltchek spent five years living and traveling throughout oceania during his journey he interviewed politicians social workers journalists teachers doctors and the local inhabitants he became friends with the great pacific writer epeli hau ofa who declared him an honorary citizen of oceania and he intricately documented the appalling effects western government policies corporate strategies and military operations were having on the islands and the peoples of the pacific

noam chomsky discusses western power and propaganda with filmmaker and investigative journalist andre vltchek this book is the perfect introduction to chomsky s political thinking and makes a refreshing read for anyone who is uneasy about the west s wider role in the world beginning with the new york newsstand where chomsky started his political education as a teenager the discussion broadens out to encompass colonialism and imperial control propaganda and the media the arab spring and drone warfare the authors offer a powerful critique of the legacy of colonialism touching upon many countries including syria nicaragua cuba china chile and turkey contains a new foreword by noam chomsky

this book is unique in the way that it looks at the much talked about maritime security through the perspective of national security without disconnect in the terrain specific mode of the ocean the

uniqueness is not in the treatment of the concept of maritime security but that of national security in a manner that is different from the beaten notion of physical security of a nation and its people from external and internal threats national security according to the author is more than just military security or the conditions of what is often termed as internal security it is complex according to his studied findings the book provides a warning to governments that any approach to national governance without integrated maritime security can be defeating in the overall objective of maximising national security even for landlocked countries in the modern world the book provides a comprehensive review and analysis of integrated maritime security providing ample scope for further research on many of the concepts and terminologies inculcated as findings of research the interesting aspect is that the author views maritime security as a ghost protocol to hammer his ideas into the earnest listener

north korea has posed a threat to stability in northeast asia for decades since kim jong un assumed power this threat has both increased and broadened since 2011 the small isolated nation has detonated nuclear weapons multiple times tested a wide variety of ballistic missiles expanded naval and ground systems that threaten south korea and routinely employs hostile rhetoric another threat it poses has been less recognized north korea presents a potentially greater risk to american interests by exporting its weapons systems to other volatile regions worldwide in north korean military proliferation in the middle east and africa bruce e bechtol jr analyzes relevant north korean military capabilities what arms the nation provides and to whom how it skirts its sanctions and how north korea's activities can best be contained he traces illicit networks that lead to state and nonstate actors in the middle east including syria iran hezbollah and hamas and throughout africa including at least a dozen nations the potential proliferation of nuclear and chemical weapons technology and the vehicles that carry it including ballistic missiles and artillery represent a broader threat than the leadership in pyongyang including training and infrastructure support north korea's profits may range into the billions of dollars all concealed in illicit networks and front companies so complex that the nation struggles to track and control them bechtol not only presents an accurate picture of the current north korean threat he also outlines methodologies that washington and the international community must embrace in order to contain it

andré vltchek has compiled a stunning record in evoking the reality of the contemporary world not as perceived through the distorting prisms of power and privilege but as lived by the myriad victims he has also not failed to trace the painful and particularly for the west shameful realities to their historical roots in this work vltchek extends his penetrating gaze to a lovely desecrated almost forgotten vast area of the world oceania which he shows to be a microcosm of almost all major

problems faced by our planet he brings to light the strength and courage of the people and their achievements and explores the hopes for decent recovery and survival if the powerful can allow themselves to comprehend what they have done and to accept the responsibility of actually protecting their victims instead of mouthing comforting and self serving slogans noam chomsky

aurora is a tremendous work aurora is what a literary work should be fully human it is also what used to be known as a major literary work because it is rare to its time it represents a leading edge of consciousness courage and social need a major work that is why it must be buried as we know it is glad it can be part of it aurora is written at a consistently intense dynamic level i wish it could be 500 pages and dropped like a sonic boom on all the acclaimed literary centers of the world and be released like a climatic change for the good in the rest of the world perhaps the most vital feature or effect of aurora is that it expands consciousness or perception it thinks the unthinkable the bankruptcy and worse of the louvre etc the culture it does what a lot of great works of art do it criticizes art itself explicitly and implicitly and in doing so helps to make the needed room for itself in the world of art and in the world in general it creates and helps generate new thought understanding perception going forward it helps not only express the full human condition it helps transform it it is a working work of art a badly needed new experience it enters the battle it will be ignored dismissed and fought by the old world while by the new world it will be part of another story entirely tony christini author of homefront

for more than sixty years nuclear weapons have cast a frightening shadow over world politics from their first use in 1945 these incredibly destructive weapons have influenced nearly every government's military policy while there are strict international laws regarding the possession and development of nuclear weapons even they cannot stop nuclear proliferation this book tells the high stakes story of nuclear technology its proliferation and the tense scramble to prevent nuclear weapons from getting in the wrong hands

nuclear materials have never been more plentiful or more accessible to rogue states and terrorists in this study the authors analyze the consequences of such nuclear leakage for united states national security and argue that it is possibly the nation's

the united states and the russian federation are engaged in a war of words a war that has elevated tensions between these political military and economic rivals to its highest level since the end of the cold war in 1989 spurring the bellicose discourse 1 russian incursion in the ukraine and crimea to reestablish russian influence in those lands 2 concerns expressed by former warsaw pact nations e.g. poland romania and estonia regarding russian intentions and 3 the response of nato and the u.s. to calm those concerns according to russian leaders this territory historically belongs to russia regardless of this diplomatic debate however facts on the ground matter much more the population in the eastern one third of the country and all of crimea geographically sitting atop the black sea are predominately russian speaking ukrainians whose ancestry has been tied to the land for centuries loathe the russians as a result the conflict has grown into a virtual civil war during the past two decades the united states has supported ukrainian desires to participate in the european union and join nato while russia has argued these actions foment rebellion among what they regard as a minority of ukrainians underneath these somewhat superficial arguments russia worries about its largest submarine base in crimea at sevastopol which they consider utterly vital to their security additionally russia aggressively continues to seek a geographical buffer between itself and europe having been devastated by two great wars during the past 100 years europe protests the incursion but seems unwilling and unable to use military force to push russia back from its designs on ukraine and crimea only the u.s. displays the willingness to hold the line and demand russia back down now the u.s. increases its rapid deployment force and naval assets to the region to put russia in check but

what motivates the u s russian nerves remain on edge due to a slumping russian economy its aging weapon systems and frequent bouts of political unrest domestically but especially in russia s eastern and southern republics russia s federal government depends on a steady high price of oil and natural gas with as much as 52 of its revenue coming from these sources then there is the state of the russian people they suffer under economic sanctions imposed by europe and the united states backed into a corner is it surprising russia rattles its sabre however russia s only sabre its one area of military superiority russian tactical nuclear weapons outnumbering natos tactical nukes 10 to 1 in the region as russia weakens in critical areas several principal factors are converging which suggest russia must act now to diminish u s economic dominance military superiority and political influence for russia seeks to curb u s meddling in regional affairs that they surmise threatens its national security additionally russia advances the strategic view that it is washington and not moscow that promotes domestic disputes throughout eurasia what russians term color revolutions to russian leaders these color revolutions comprise cia covert operations and insurrections intended to destabilize nations russia regards vital to its interests all the way from syria to afghanistan in short the ukraine controversy may be a symbol of a much broader and deeper conflict it constitutes a geopolitical sparring match a contest in which both sides test the other s resolve to dominate global politics in the 21st century in addition to examining why this verbal exchange foreshadows nuclear war sometime in the next few years this study will discuss whether this potential war could be the fulfillment of biblical predictions regarding the dismal fate of what the bible calls the daughter of babylon finally we consider the possible timing of this horrific confrontation in light of other end time events

this book brings together cutting edge scholarship from the united states and europe to address political as well as cultural responses to both the arms race of the 1980s and the ascent of nuclear energy as a second controversial dimension of the nuclear age diverse in its topics and disciplinary approaches nuclear threats nuclear fear and the cold war of the 1980s makes a fundamental contribution to the emerging historiography of the 1980s as a whole as of now the era s nuclear tensions have been addressed by scholars mostly from the standpoint of security studies focused on the geo strategic deliberations of political elites and at the level of state policy yet nuclear anxieties as the essays in this volume document were so pervasive that they profoundly shaped the era s culture its habits of mind and its politics far beyond the domain of policy

an analysis of anti nuclear politics through the lens of postmodern theories of language and society

por lula esse livro é minúsculo porém é um tributo de pleno coração para o maior homem da história brasileira É a expressão do meu apoio e admiração pela sua luta e por seu caráter num mundo corrompido e controlado pelas cruéis forças capitalistas e imperialistas o lugar mais honroso para morar é uma prisão mas isso não é um arranjo natural ou desejável do mundo em breve os verdadeiros patriotas e líderes do grande brasil estarão novamente governando e as prisões serão para os criminosos incluindo aqueles que se prostituem descaradamente vendendo sua própria pátria a interesses e a dominantes estrangeiros
